Summary

Backend Developer specializing in **REST API** development using **NestJS**, **database management**, and **system performance optimization** for efficiency and scalability. Experienced with **Firestore**, **Supabase**, **MySQL**, and **PostgreSQL (PgAdmin 4)**, and possesses foundational **Frontend Development** skills with **Next.js**, **Tailwind CSS**, **Bootstrap**, and **TypeScript** to support application integration. Additional expertise includes the **Laravel** and **CodeIgniter** frameworks. Interested in **Machine Learning**, **Data Mining**, **deployment**, and **cloud computing**, with an analytical approach and strong **problem-solving** skills. Focused on creating **reliable**, **secure**, and **high-performance** systems, and continuously developing skills in line with **technological advancements**.

Core Skills:

- **Backend Development:** NestJS, Laravel, CodeIgniter
- **Development:** REST API design & implementation
- **Databases:** PostgreSQL (PgAdmin 4), MySQL, Supabase, Firebase
- **Frontend (basic):** Next.js, Tailwind CSS, Bootstrap, TypeScript
- **System Optimization:** Performance tuning & scalable architecture

Certifications

LSP P 1 — Professional Certification Institution (First-Party)

2020

Bandung State Vocational School 11 responsible for administering **competency-based professional certification** for graduates.

Web Programming

14/12/2020

Education

General Achmad Yani University

Informatics

Bachelor

Indonesia • 09/2026

Currently pursuing a **Bachelor's Degree in Information Technology**, specializing in **Full-Stack Development** and **Software Engineering**. Actively involved in **academic projects**, with experience as a **Teaching Assistant** and **Freelancer**.

Experience

PT Panenmaya Slmamaung

Internship for developing applications

Bandung

06/2020 - 08/2020

Developed a **news portal** website for **Persib Bandung**, featuring **news articles**, **match schedules**, and **scoreboards** using **PHP** and **MySQL**.

Key & Achievements:

- Designed and implemented **database schema** to manage articles, schedules, and live scoreboards.
- Developed **backend logic** for content management and data integration.
- Improved **user experience** through optimized data retrieval and responsive web layout.
- Ensured **system reliability** and **scalability** for handling growing traffic.

Technologies & Skills:

- **PHP**, **MySQL**
- **Backend Development**, **Database Management**, **Web Application Development**
- **Problem-Solving**, **System Optimization**

PT Wahana Interfood

Warehouse Quali Control

Cimahi

08/2021 — 08/2022

Responsible for **maintaining the quality of goods** used in **production processes** and **packaging materials**, including **milk**, **cocoa powder**, **sugar**, **plastic**, and **boxes**. Worked **full-time** ensuring **quality standards**, **storage safety**, and **production readiness**.

Key Responsibilities & Achievements:

- Conducted **quality inspections** on raw materials and packaging products.
- Ensured compliance with **production standards** and **safety regulations**.
- Maintained **inventory quality** for both stored products and production use.
- Collaborated with **production teams** to identify and resolve quality issues.
- Improved **efficiency** by implementing **quality assurance procedures**.

Technologies & Skills:

- **Quality Control (QC)**, **Inventory Management**

PT Cakrawala Global
an organization in the IT sector delivering
reliable, high-quality IT products that meet
international standards.

Languages

Indonesia

Mother Tongue

English

- Documentation & Reporting, Attention to Detail, Problem-Solving
- Familiarity with production workflows and supply chain processes

Meteorology, Climatology, and Geophysics Agency Bengkulu
Internship for developing applications 02/2025 - 07/2025
Designed and implemented a REST API for a web-based application-
, enabling the recording of guest data and providing relevant agencies with
information regarding guests and their needs.

Key Responsibilities & Achievements:

- Developed REST API endpoints for guest registration, visit tracking, and reporting.
- Designed and optimized database schema to store guest information efficiently.
- Ensured data security and role-based access control for agencies.
- Improved system scalability and performance to handle multiple guest entries.
- Collaborated with frontend developers to ensure seamless API integration.

Technologies & Skills:

- NestJS, Node.js, TypeScript
- Supabase, PostgreSQL, Firebase, MySQL
- REST API Development, Database Management, Authentication & Authorization
- System Optimization, Collaboration, Problem-Solving

PT. Minilemon Nusantara Indonesia
Freelance Backend Developer 06/2025-12/2025
Built a REST API using NestJS and Supabase for backend development
and data management. Previously developed a similar system using
Python, FastAPI, and PostgreSQL, showcasing adaptability across different
backend frameworks and databases.

Responsibilities & Achievements:

- Designed and implemented REST API endpoints for CRUD operations and authentication.
- Integrated Supabase for database management, authentication, and storage.
- Improved system performance and scalability through optimized queries and modular architecture.
- Migrated functionality from Python FastAPI + PostgreSQL to NestJS + Supabase to align with project requirements.

Technologies & Skills:

- NestJS, Node.js, TypeScript, Supabase
- Python, FastAPI, PostgreSQL
- REST API Development, Authentication & Authorization, Database Optimization
- Cross-Framework Adaptability, Problem-Solving

Awards

Certificate of Appreciation – Server-Side Development 29/07/2025

Indonesian Agency for Meteorology, Climatology, and Geophysics (BMKG)

– Kepahiang Geophysical Station

Awarded to **Marco Sihombing** in recognition of outstanding performance as a **Server-Side Intern**. Contributed significantly to the project “**Feature Enhancement and Maintenance of the Earthquake Database Website**” during the **student internship program (March – July 2025)**.

Key Highlights:

- Enhanced and maintained the **Earthquake Database Website** to improve **system reliability** and **data accuracy**.
- Developed and optimized **server-side logic** for handling **real-time earthquake data**.
- Improved **database performance** and implemented **secure data handling** practices.
- Collaborated with technical teams to support **backend integration** and **system optimization**

Certificate of Appreciation – Server Side

29/07/2025

Indonesian Agency for Meteorology, Climatology, and Geophysics (BMKG)

– Kepahiang Geophysical Station

Awarded for outstanding performance during the **student internship program (March – July 2025)** as a **Server-Side Developer**. Contributed to multiple **digital transformation initiatives**, including:

- Developed the **Integrated One-Stop Service (PTSP) Website** for **BMKG Bengkulu Province**.
- Built the **Visitor Guest Book Website** for **BMKG Bengkulu Province**.
- Created the **Digital Employee Directory Website** for the **Climatological Station**.

Key Skills Demonstrated:

- **Server-Side Development**
- **REST API Design & Integration**
- **Database Management (Supabase, Firebase)**
- **Backend Architecture & System Optimization**
- **Scalable Application Development**
- **Cross-Platform Web Integration**
